

Allegro Mobile Solutions

Allegro Mobile Solutions is an international mobile solution provider offering mid-market, enterprise and public-sector customers enterprise-grade mobile applications based on its MEAP - Mobile Enterprise Application Platform supported by a full range of Mobile Software, Mobile Infrastructure and Professional Services.

Allegro provides advisory services and thought leadership to its clients, supporting them in the development and refinement of their mobile vision and strategy. Bringing together cross-industry and cross-platform expertise, a depth in mobile security, and an intimate knowledge of application integration, Allegro has formed a Center of Excellence around best practices in designing, configuring and implementing enterprise-grade mobile software applications based on its mobile enterprise application platform. From a WLAN infrastructure and a user device perspective (hand-held, tablet or digital display), Allegro leverages best of breed vendors to equip clients with the latest advancements in mobile technology.

The mobility experts and wireless engineers within Allegro's professional services team assist clients with designing, implementing, and securing standard and complex WLAN implementations in support of Allegro's software and applications. As a trusted advisor and support organization, Allegro Mobile Solutions offers its clients a variety of support, hosting, application, and device management services so that clients can focus their efforts on their core business and not on worrying about their mobile networks.

Mobile Vision and Strategy

Software

(Software and Industry Solutions)

Industry Software Suites

- Field Services
- Transportation and Logistics
- Retail Management
- Government and Healthcare
- User productivity modules

Mobile Thought Leadership

- Mobile vision and strategy
- Software selection
- Business process reengineering
- Wireless security
- Change Management

Infrastructure

(Infrastructure and User Devices)

Complex WLAN Infrastructures

- Controllers and access points
- Mesh routers and switches
- Devices, infrastructure & security

End-User Devices

- Hand-held devices
- Peripherals - scan, swipe & print
- Tablets, kiosks and digital signage

Best of Breed Vendors

- Devices, infrastructure & security

Services

(Mobility Experts and Support)

Mobile Infrastructure

- Strategy, architecture & design
- Security & compliance
- Large WLAN implementations

Custom Development

- App development & integration

Managed Services

- Monitoring and troubleshooting
- Cloud-based hosting and support
- Staging, kitting and device repair

Allegro Mobility Platform (MDAP / MEAP - Mobility Enterprise Application Platform)

- SOA architecture for Plug & Play app configuration
- Core application, integration and security engines
- AMP-RS - real time device management suite
- Rich or thin client (Windows, Apple iOS & Android)
- Cloud-based, hosted or client-server
- Ongoing monitoring, application maintenance and support

Flexible, Scalable and Secure

Each of the Allegro software suites (Field Services, Transportation and Logistics, and Retail Management) are powered by the Allegro Mobility Platform, a true enterprise-level mobile application platform offering unified security, administration, remote management, reporting and integration functions.

Allegro Mobility Platform (Cross-device, Cross-OS – Windows, Apple iOS, Android)

- ✓ Personalized multi-lingual user interface for your mobile users
- ✓ Advanced security functions to defend against intrusions and exposures caused by un-authorized access
- ✓ SOA-based plug & play modules to support the rapid configuration of your mobile solution
- ✓ Centralized remote management for the administration of users, software and devices
- ✓ Platform databases support the plug & play modules and record key events, transactions and user activities
- ✓ The advanced SOA (Service Oriented Architecture) core supports the platform's flexibility and scalability
- ✓ Numerous custom and pre-defined integrations including integrations certified with SAP and other systems
- ✓ (MDAP / MEAP - Mobile Enterprise Application Platform)

Allegro's Industry Software Suites

Field Services Suite

- Managing the Workforce
- Accessing Remote Knowledge
- Energizing the Customer Experience

Transportation and Logistics Suite

- Streamlining the Warehouse/DC
- Improving Driver Communications
- Energizing the Customer Experience

Retail Management Suite

- Optimizing the Supply Chain
- Boosting In-store Efficiency
- Energizing the Customer Experience
